**OBSERVE ALL CAUTIONS. RISK OF ELECTRICAL SHOCK
RISK OF SEVERE BURNS. RISK OF FIRE.**

Instructions

The Centigrade C-Single is a thermoelectric cooler or warmer. It uses an Ultra-Quiet CFC-Free Cooling System. It does not have a compressor. In cooling mode it is specifically designed to cool a standard 12oz can. In heating mode, it is used with the provided coffee cup to keep liquids warm.

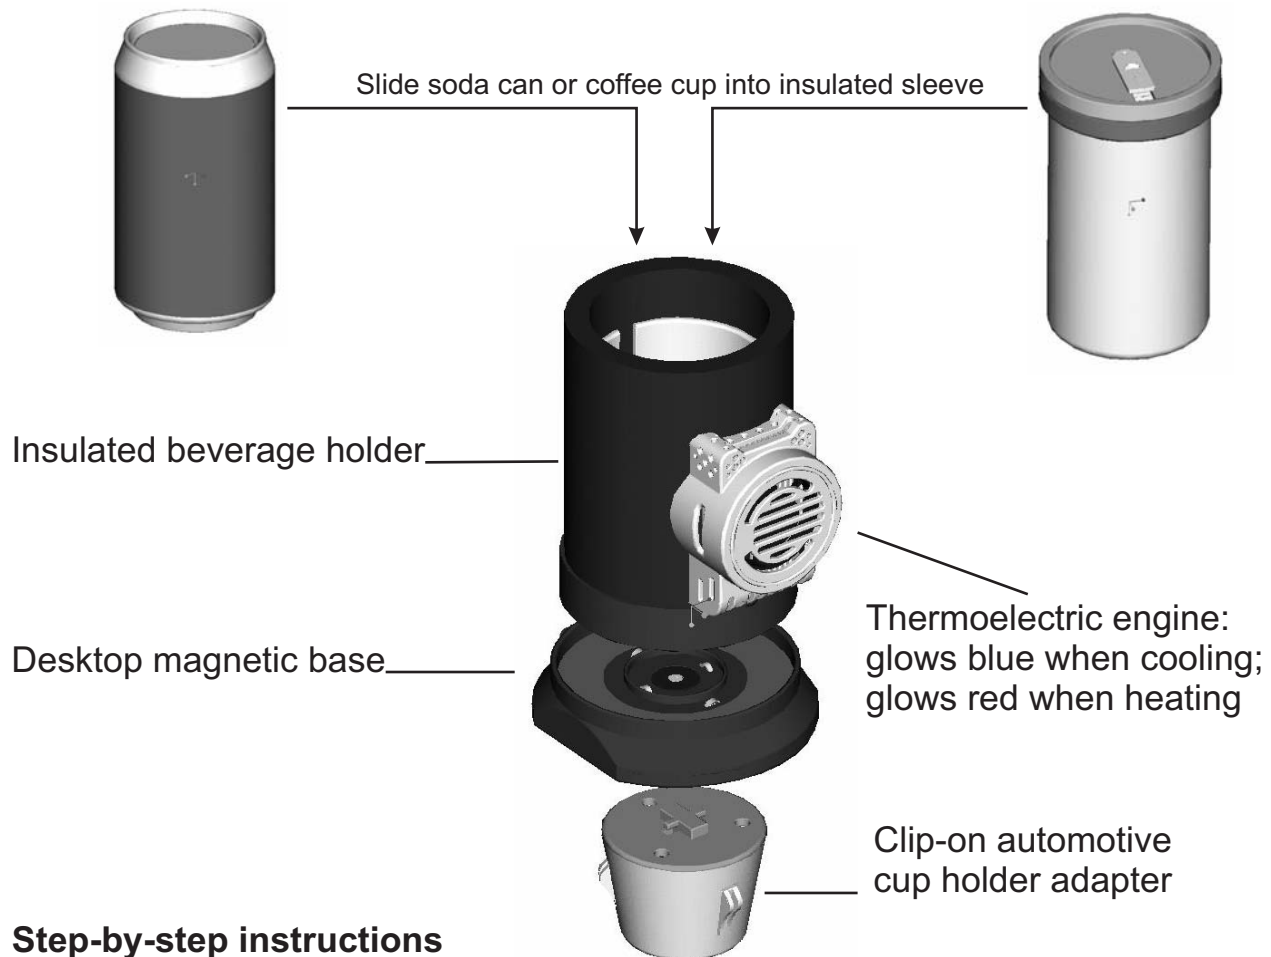

The Centigrade C-Single can either operate from standard 12VDC automotive Power Outlet, or from standard 120VAC Household power using the provided AC/DC wall adapter.

Cooling mode:

Use soda can or bottled water

Heating mode:

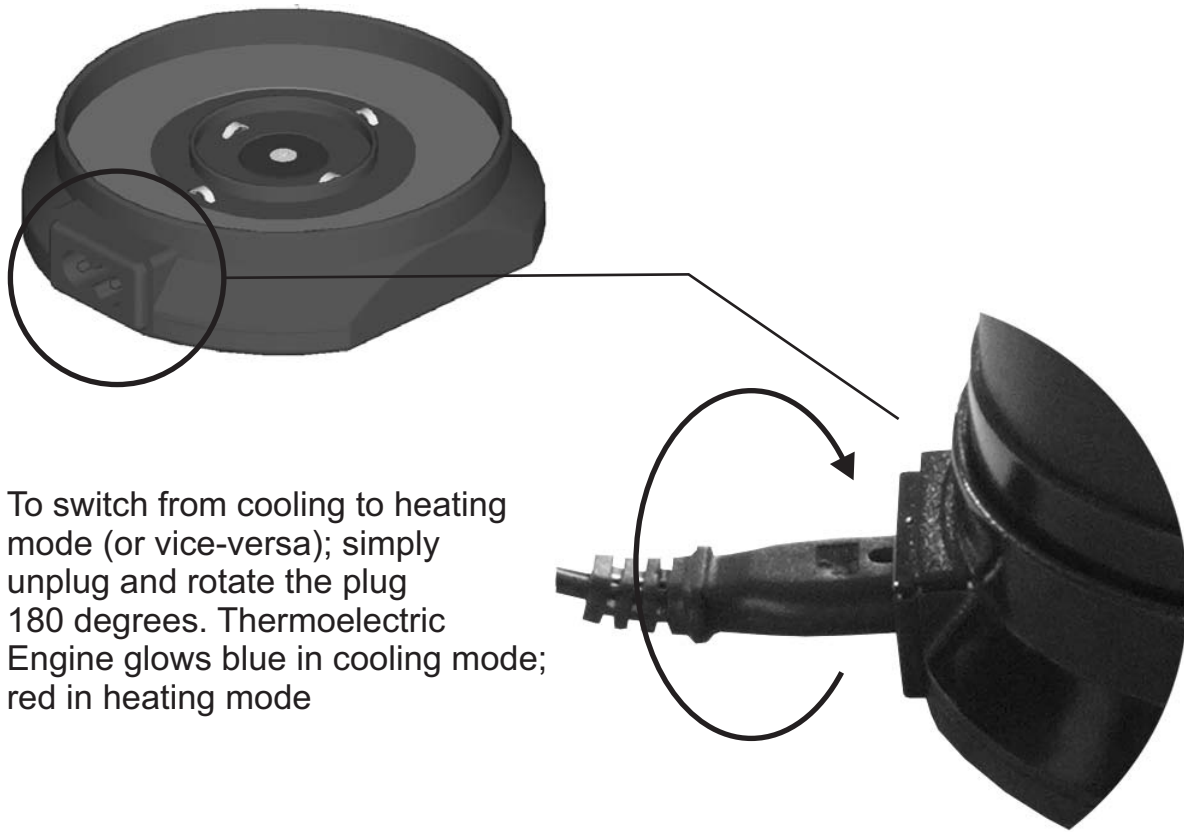

ONLY use provided coffee cup accessory

Step-by-step instructions

1. Choose your operating mode by plugging in the DC cord into the Desktop Magnetic Base (see details next page). Thermoelectric Engine glows blue in cooling mode, glows red in heating mode. Simply reverse the plug to switch operating mode.
2. Insert soda can or plastic bottle into Insulated Beverage Holder (cooling mode ONLY), or insert coffee cup accessory (heating mode).
3. To take a drink simply detach the Insulated Beverage Holder from the Magnetic Base, re-place on base when done to continue active cooling or heating. The Thermoelectric Engine turns off when separated from the Magnetic Base.
4. Use the Clip-on Automotive Adapter when using in a Vehicle.

Choosing cooling or heating mode

To switch from cooling to heating mode (or vice-versa); simply unplug and rotate the plug 180 degrees. Thermoelectric Engine glows blue in cooling mode; red in heating mode
